DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1: figures 1-5, Species 2: figures 5-7, Species 3: figure 8, species 4: figure 9, species 5: figure 10, species 6: figure 11, species 7: figure 12, species 8: figure 13, species 9: figure 14, species 10: figure 15, species 11: figure 16, species 12: figure 17, species 13: figure 18, species 14: figure 19, species 15: figure 20, species 16: figures 21-22, species 17: figure 23, species 18: figure 24, species 19: figure 25, species 20: figure 26.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. **The reply must also identify the claims readable on the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: There is no special technical feature inasmuch as the generic claim is anticipated by both US 5282327 (Ogle) and WO 97/37556.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
